Holla!

I am Kevin Audreylius.

welcome to my portfolio! I'm a Computer Science graduate from Bina Nusantara University with a passion for Back-End and Full-Stack Development. I enjoy building things, exploring new technologies, and turning ideas into functional applications. Here, you'll find a collection of projects I've worked on, technologies I've explored, and experiences that have shaped my journey as a developer. Feel free to take a look around!

Education

Universitas Bina Nusantara
Computer Science
GPA: 3.79 /4.00
2022 - 2026

SMA Bunda Hati Kudus
Science
2019 - 2022

Organization & Experience

Nov 2022 - May 2023
BNCC Learning & Training
Front End Development Course Member

Oct 2022 - Aug 2023
Bina Nusantara Computer Club (BNCC)
Activist

Oct 2022 - Aug 2023
Mavis The Label
Social Media Content Designer

Work Experience

Kamoro Maxima Integra

Software Engineer

Mar 2026 - Present

- Gathered and analyzed client requirements, translating them into system architecture, database schemas, and technical solutions.
- Developed and enhanced .NET-based applications and REST APIs, implementing business logic, dynamic forms, validations, workflows, and data processing.
- Delivered 15+ application enhancements to support evolving business requirements and improve application functionality.
- Investigated and resolved 20+ application issues through debugging, code tracing, log analysis, and database inspection to identify root causes.
- Performed root cause analysis (RCA) for functional and technical incidents, implementing corrective solutions to improve application stability.
- Developed and optimized 30+ SQL queries and stored procedures to support business logic and application requirements.
- Collaborated with clients, developers, and support teams throughout the end-to-end development lifecycle, from requirement gathering and implementation to testing, deployment, and ongoing support.

PT Freeport Indonesia

Application Developer intern

Feb 2025 - Feb 2026

- Developed and maintained PTFI internal web applications using .NET Core, HTML, CSS, Bootstrap, JavaScript, Vue.js, C#, and SQL Server.
- Implemented dynamic user interfaces, including form configurations, client-side validation, and approval workflow logic to support complex business processes.
- Assisted in debugging and testing applications to ensure functionality, data accuracy, and system stability.
- Modified and maintained SQL Server stored procedures to support new business logic and reporting requirements.
- Collaborated with developers, business users, and support teams in an agile working environment.
- Supported CI/CD processes using Azure DevOps and participated in deployment and handover activities to the support team.
